TITLES AND SUBJECTS

Data Processing

W. G. Ansley, An Engineering Analysis of Production Costs for Semiconductor Devices, January–February, p. 52.
David S. Bugby and Joseph P. Schwitter, Conversion to Computerized Inventory Control, September–October, p. 328.
Richard W. Conway, Priority Dispatching and Work-in Process Inventory in a Job Shop, March–April, p. 123.
Gerald A. Fleischer and Isu Fang, A Flexible Computer Program for Tabulation of Compound Interest Factors, September–October, p. 334.
Burt Nanus, Industrial Engineering Opportunities in Computer Programming Management, July–August, p. 223.
J. A. Stevens and G. E. Millard, Electronic Data Processing of Patient Medical Records, July–August, p. 237.
Royce W. Van Norman, Charles Babbage, January–February, p. 3.

Decision Theory

George H. Brooks and Charles R. White, An Algorithm for Finding Optimal or Near Optimal Solutions to the Production Scheduling Problem, January–February, p. 34.
W. J. Fabrycky, A Multisource Procurement and Inventory Model, July–August, p. 277.
William E. Hammer, Jr., Estimation of the One-Step Transition Probability Matrix, July–August, p. 286.
Frederick S. Hillier, Cost Models for the Application of Priority Waiting Line Theory to Industrial Problems, May–June, p. 178.
A. Alan B. Pritsker, A Decision Theory Approach to Enrollment Prediction, May–June, p. 164.

Documentation

J. A. Stevens and G. E. Millard, Electronic Data Processing of Patient Medical Records, July–August, p. 237.

Economics

Richard H. Bernhard, On the Choice of a Cutoff Rate for the Internal Rate of Return, May–June, p. 201.
James R. Burton, An Incentive for Operators whose Production is Machine Controlled, January–February, p. 56.
Jack H. Doty, Human Capital Budgeting—Maximizing Returns on Training Investment, March–April, p. 139.
J. Morley English, A Discount Function Comparing Economic Alternatives, March–April, p. 115.
Pearson Graham, Profit Probability Analysis of Research and Development Expenditures May–June, p. 186.
Seymour Kaplan (Technical Note), A Note on a Method for Precisely Determining the Uniqueness or Nonuniqueness of the Internal Rate of Return for a Proposed Investment, January–February, p. 70.
Arnold Reisman, Capital Budgeting for Interrelated Projects, January–February, p. 59.

Education

Ralph J. Beuter and Albert B. Drui, An Industrial Engineering Situation—An Action Maze, July–August, p. 260.
Biman Das, Applying Programmed Learning Concepts to Instruct in Performance Rating, March–April, p. 94.
R. K. Wilkinson and G. Mills, The Use of a Business Game in Management Training, July–August, p. 282.

Engineering Economy

J. F. Brennan, On the Optimum Mean Life of Physical Plant, November–December, p. 362.
Steven J. Dodd, Dial-A-Factor, November–December, p. 377.
J. Morley English, A Discount Function Comparing Economic Alternatives, March–April, p. 115.
Gerald A. Fleischer and Isu Fang, A Flexible Computer Program for Tabulation of Compound Interest Factors, September–October, p. 334.
P. S. Mankekar and L. G. Mitten (Technical Note), The Constrained Least Cost Testing Sequence Problem, March–April, p. 146.

Facilities Planning (Plant Layout)

Joseph J. Moder and Herbert M. Thornton, Quantitative Analysis of the Factors Affecting Floor Space Utilization of Palletized Storage, January–February, p. 8.

Forecasting

Wen M. Chow, Adaptive Control of the Exponential Smoothing Constant, September–October, p. 314.
Marvin S. Fruchter, Establishing Long Range Labor Forecasts for a Diversified Shipping Center, November–December, p. 385.
Spencer B. Smith, An Input-Output Model for Production and Inventory Planning, January–February, p. 64.

Hospital

Ruddell Reed, Jr. and Walter E. Stanley, Optimizing Control of Hospital Inventories, January–February, p. 48.
J. A. Stevens and G. E. Millard, Electronic Data Processing of Patient Medical Records, July–August, p. 237.

Human Factors

Philip B. Applewhite, Job Satisfaction and Industrial Morale, May–June, p. 198.
Walter L. Balk, The Destructive Stereotype, May–June, p. 208.
Biman Das, Applying Programmed Learning Concepts to Instruct in Performance Rating, March–April, p. 94.
Jack H. Doty, Human Capital Budgeting—Maximizing Returns on Training Investment, March–April, p. 139.
Richard A. Dudek and Michael J. Petruno, Investigation of an Operator's Ventilation Rate Under Static Work Loads, November–December, p. 368.
